

TALASRI JAYANTH

Software Engineer | Cloud & AI Enthusiast

Parvathipuram, Andhra Pradesh | +91-7093533086

jayanthtalasri@gmail.com | www.linkedin.com/in/jayanth-talasri-7b5b09320 | <https://github.com/jayanth-talasri>

PROFESSIONAL SUMMARY

Aspiring Software Engineer with skills in web development, cloud computing, and machine learning. Experienced in building scalable projects using React, Django, AWS, and deep learning models, with a strong interest in AI-driven software systems.

EDUCATION

B. Tech in Information Technology

(2022 – 2026)

Aditya Institute of Technology and Management, Tekkali

CGPA: 8.07/10

TECHNICAL SKILLS

Programming: Python, C, C++, java(basics)

AI & Machine Learning: Pandas, NumPy

Web Technologies: HTML, CSS, JavaScript, React

Core CS: DSA, OOP, DBMS, OS

Cloud & DevOps: AWS (EC2, RDS), Cloud Deployment

Databases: SQL

EXPERIENCE

AWS Cloud Intern – Smart Bridge

May 2025 – July 2025

- Deployed and maintained cloud-based applications on AWS EC2 and RDS, ensuring scalability and high availability.
- Improved system reliability by identifying and resolving deployment issues during testing phases.
- Collaborated with team members to implement secure deployment practices and enhance application stability.
- Gained hands-on experience in cloud deployment workflows and foundational DevOps practices.

PROJECTS

Software Developer Portfolio Website | Link: <https://talasrijayanth.vercel.app/>

Technologies: React, Tailwind css, Framer motion, versal, Formspre

- Developed a personal portfolio website showcasing my skills, projects, and professional details.

Solar Irradiance Forecasting using Deep Learning (LSTM)

Technologies: Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

- Analyzed time-series meteorological data and performed data preprocessing and feature engineering.
- Developed predictive models (LSTM, SVM, Linear Regression) achieving $R^2 = 0.95$.
- Evaluated model performance using MAE, RMSE, and MAPE.
- Visualized trends and predictions to derive insights for solar energy forecasting.

Movie Magic | Full-Stack Ticket Booking Platform

Technologies: Django, SQL, HTML, CSS, JavaScript, AWS EC2, Amazon RDS

- Engineered a full-stack movie ticket booking platform using Django, implementing secure user authentication, streamlined booking workflows, and real-time seat availability management.
- Deployed the application on AWS EC2 integrated with Amazon RDS, ensuring high availability, scalability, and reliable cloud-based performance with optimized SQL query execution.
- Designed and developed a responsive, user-centric interface, enhancing user experience across devices and improving response time for concurrent user interactions.

CERTIFICATIONS

- AWS Certified Cloud Practitioner.
- NPTEL (IIT) – Deep Learning.
- Data Structures & Algorithms – Geeks for Geeks.
- Cybersecurity Fundamentals Associate – Zscaler Academy.

ACTIVITIES

- Participant – Smart India Hackathon 2024.
- Participated in Cybersecurity and SQL Hackathons.
